

# Phillips 66 Portland Refined Products Terminal and Lubricants Plant

Phillips 66 strives to be a responsible industry leader, innovator and good neighbor. With 30 full-time employees, the Portland Terminal and Lubricants Plant has provided energy to consumers in Oregon for more than 100 years. Today, we supply approximately 1.7 million gallons per day of gasoline and diesel to Oregon and beyond — enough fuel to fill about 100,000 passenger vehicles every day. Our company is also planning toward a low-carbon energy future and investing in emerging energies such as renewable fuels, hydrogen, battery technologies, and carbon capture and storage.

## Economic Contributions to State and Local Communities

**\$2.8 million**  
state taxes

**\$658,000**  
property taxes

**\$305,000**  
payroll taxes

**\$34.4 million**  
motor fuels taxes

**\$4.4 million**  
annual payroll

### Supporting and Engaging with Our Communities

We engage with our community through training with local and state emergency response agencies and our pipeline public awareness program. We hold worst-case scenario

emergency response exercises, with the most recent event in 2021 where we invited local and state officials to participate in and observe the exercise. We are also a member of the Willamette River Working Waterfront Coalition, and we work with them to support scholarships at Portland Community College.

### Ensuring Safe, Reliable Operations

Through operational excellence and safe practices, we demonstrate our commitment to delivering innovative energy solutions and strong

environmental stewardship. Our focus on safety influences every decision we make and action we take. We have been recognized with the industry's highest safety award for the past two years, and the Portland Terminal and Lubricants Plant has earned OSHA's Voluntary Protection Program Star certification for safety performance.

Preparation and emergency management systems are crucial to people's safety and security. Building local capability for resilience and preparedness is part of our commitment to environmental protection, rapid response, and operational excellence. The Portland Terminal and Lubricants Plant has adopted robust protocols to mitigate seismic or other natural hazards.
