

McCall Companies

Main Terminal:
5480 N.W. Front Avenue
Portland, OR

Prineville Terminal:
1367 N.W. Lamonta Rd.
Prineville, OR

Transportation and Location Requirements:

The terminal is a U.S. Coast Guard MARSAC marine facility. All drivers and visitors must meet McCall's strict EHS and security requirements. All drivers and visitors must have TWIC and government issued identification. The terminal can transfer commodities via truck, rail, vessel or pipeline. The location in Portland's Industrial Energy Hub is well positioned to service customers in Oregon and SW Washington.

Company Description:

The McCall Companies were established in 1936 to distribute home heating oil in the Portland area. This third-generation, Oregon family owned business operates three separate divisions.

McCall Asphalt Products is the largest provider of paving grade and industrial asphalts in Oregon. McCall supplies cities, counties and ODOT. Our industrial material division supports four large roofing manufactures in Portland.

McCall Renewable Fuels provides fuel for transportation, construction and marine uses specializing in bio-blends and renewable fuels in support of the Oregon Low Carbon Fuel Standard.

McCall Terminal Services provides dock services to vessels, barges and tugboats, via our Willamette River deep draft dock.

Community Benefit:

- Our mission is to be the finest supplier of asphalt and energy products while providing our customers with exemplary quality, service and value through a culture of safety and environmental stewardship.
- McCall employs 32 individuals, providing them with competitive, working wage salaries and benefits. Many of the operators are from the Inland Boatman Union.
- Philanthropy is at the root of the McCall family and McCall Companies. We have a long history of corporate giving in Portland and throughout the Northwest. Our giving focuses on healthcare, social needs, and a variety of community services

Sustainability:

McCall Asphalt is engaged in research and development to create innovative asphalt products that allow more renewable content such as recycled asphalt, roof shingles, and tire rubber, while still meeting strict performance standards.

McCall Renewables is proud to be the exclusive distributor of sustainable renewable diesel manufactured by Neste. We are also a leader in bio-fuel blending helping transportation companies meet Oregon's Low Carbon Fuel Standard.
