

# WEIR ESCO

The Weir Group is a mining engineering business with 150 years of seeing things differently.

## ESCO Division Headquarters

2141 NW 25th Avenue  
Portland, Oregon 97210

## Plant 3 Foundry Operations

2770 NW Yeon Avenue  
Portland, Oregon 97210

## Key Partner Affiliations

Cleaner Air Oregon, Energy Trust of Oregon Strategic Energy Management Program, Portland General Electric Energy Partner Program

## Our Mission

To enable the sustainable and efficient delivery of the natural resources essential to create a better future for the world.

## Leadership:

**Andrew Neilson**  
President, ESCO  
Division of Weir

## What We Do

The ESCO® division of Weir provides highly engineered mining and infrastructure G.E.T. (ground engaging tools) to extract and transport minerals essential to the world.

## We Are #1 In GET

### MINING

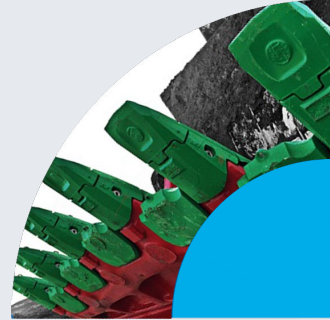

Surface and underground

### INFRASTRUCTURE AND AGGREGATE

Highway, utility, dredge, metal recycling, fiber processing

### INDUSTRIAL

Metal recycling, wire rope rigging and fiber processing

## Our Operations

**c.11,000**

people across the global Weir family

**c.2,500**

ESCO division

**50+**

countries

**50+**

operating sites in global manufacturing, fabrication, distribution, supply & service

## Our Strategy

Weir plays a leading role in mining's digital and sustainable transformation. That is why we have put sustainability at the heart of our strategy.

### CHAMPIONING ZERO HARM

We maintain a zero-harm commitment.

### CREATING SUSTAINABLE SOLUTIONS

We aim to achieve Net Zero by 2050.

### REDUCING OUR FOOTPRINT

We lead by example to reduce CO2e, water and waste.

### NURTURING OUR UNIQUE CULTURE

We have a unique blend of talent and culture.

## Sustainability By the Numbers

**127** No. of Oregon homes powered per month from Plant 3's energy savings (kWh)

**\$1M** Total investment of dust collection system

**80%** Percentage of reclaimed sand reused in foundry processes

Weir ESCO's Portland foundry employees have gone above and beyond to reduce air emissions, made possible through investments in equipment and process optimization, monitoring and reduced energy consumption — building on the commitments the company has made in recent years, including the completion of the State of Oregon's first Good Neighbor Agreement, which resulted in a 75% reduction in phenol emissions.
